HONGKE BRAND STORY

Zhejiang Hongke Valve Co., Ltd. has co-founded by Mr. Zeng Hongke and Ms. Kong Linmei since 2008, which initially engaged in plastic hardware building materials for building decoration. Over the past 15 years, our product range has grown steadily, forming three product systems: “agricultural irrigation valve, water pump connection pipe fittings, bathroom accessories faucet” . Nowadays, we offer the full range of irrigation and water supply solutions for agriculture, forestry, aquaculture, industrial and residential sectors.

We are willing to grow with customers, good at helping them build a platform, providing professional product solutions, marketing solutions and export services, including OEM brand customization, mold and new product development for medium and large customers. With attractive price and stable quality, we have accumulated more than 500 customers worldwide, our products are exported to Southeast Asia, South Asia, the Middle East, South America and Africa markets, which are deeply trusted by customers.

In order to let customers know the products in a timely manner, Hongke has built a detailed and complete information network; with keen market expertise and 1v1 personalized customized services, it has gradually entered the global markets of the Middle East, South America, Asia, Africa, Southeast Asia, etc. , and accurately grasped the standards, preferences and individual needs of customers in different market. At the same time, it has established a perfect sales channel, covering offline exhibitions, independent stations and third-party sales platforms, with a wide range of products. Based on the professional service, the building of its own factory, and the comprehensive emergency response plan, Hongke can provide solutions within four hours after the customer raises the problem, and bring professional after-sales service. All the efforts have finally paid off. In 2020, Hongke established its own modern digital factory of 10,000 square meters, with more than 100 professional first-line production personnel and more than 10 technical R&D personnel, and will continue to make remitting efforts to create a bright future.

So in 2008, the founder devoted herself to the building materials industry and established Hongke, taking its first step. Even with only 60 square meters of office space, space, capital, and manpower are insufficient, the company still adheres to high standards, strict requirements, low profile, and dreams to make high-quality products, and is committed to producing high-quality pvc valves, pvc pipe fittings, plastic faucets and other products , which has attracted a group of loyal fans with high quality.

In its process of development, on the one hand, Hongke focuses on product quality and constant innovation; on the other hand, it continuously optimizes and upgrades the system, innovates service content, strengthens personnel training, etc. After more than 10 years of efforts, Hongke gradually formed comprehensive brand advantages. It has established the service standard of focusing on high-quality and popular products and user experience first, and has won the trust and praise of more than 500 foreign customers.

Hongke was founded in **2008**

More than **10,000** square meter modernized workshops

More than **100** professional first-line production personnel

Monthly production Value:**20hq-40hq**

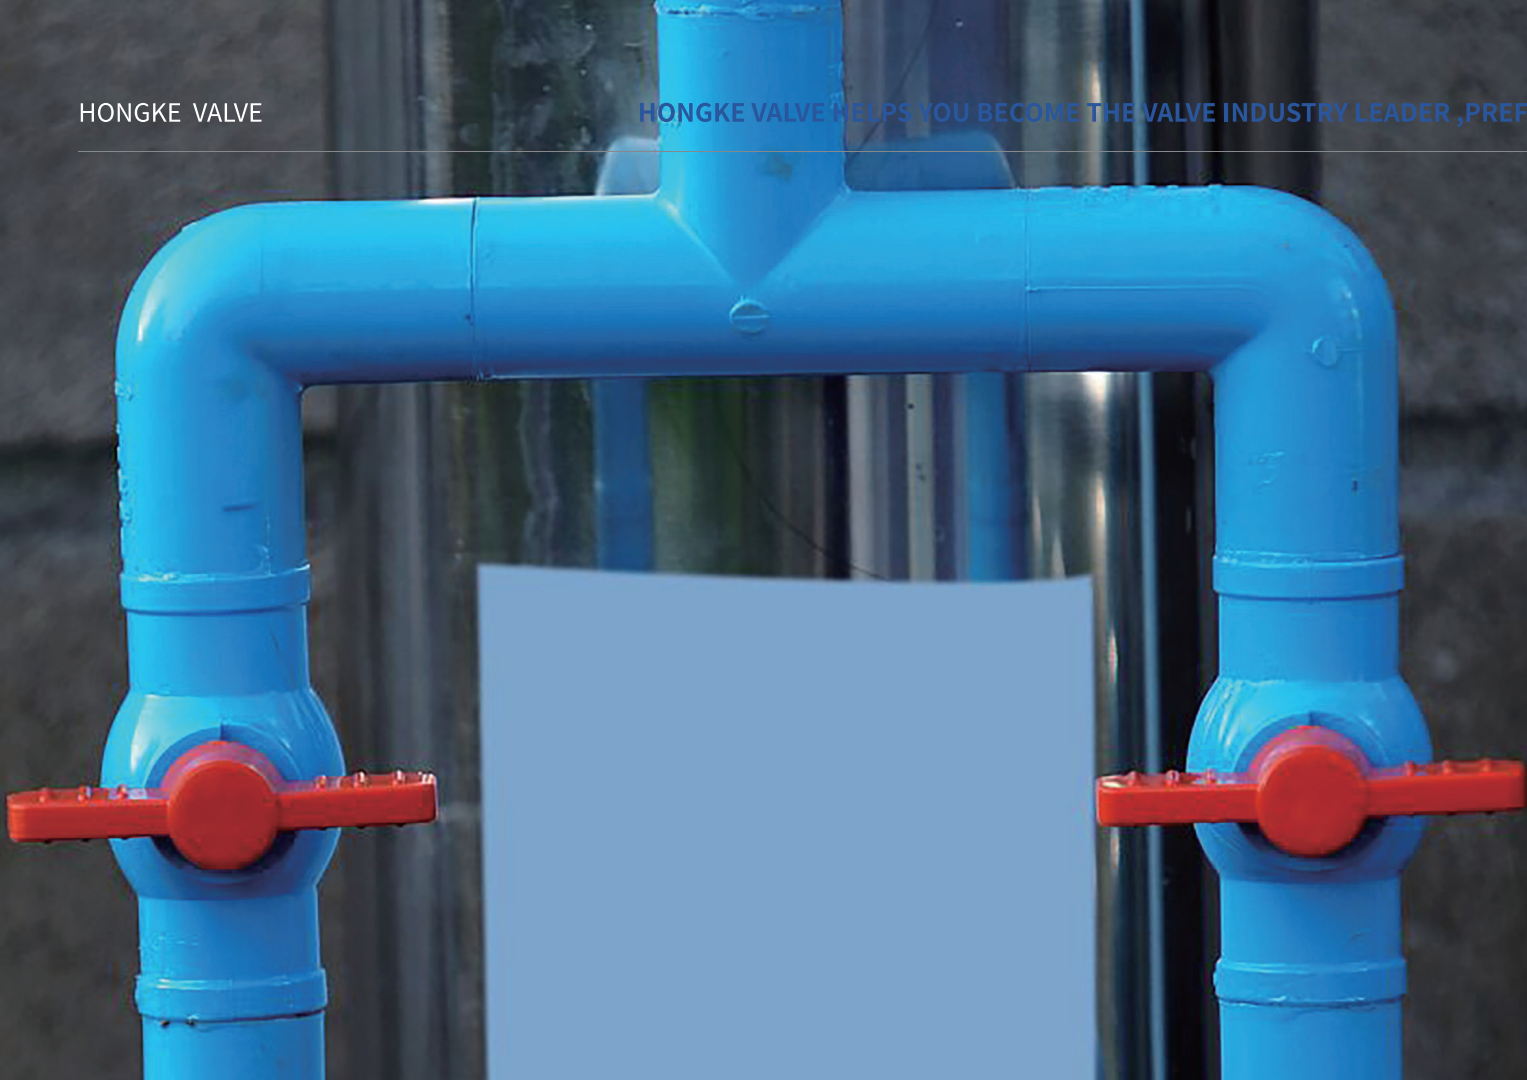

> PRODUCTION PROCESS

COOPERATIVE PARTNER

HONGKE PRODUCT SELL WELL IN MORE THAN **100** COUTRIES AND REGIONS AROUND THE WORDS,ALSO SERVED ORVER **10000** CUSTOMER,AND PROVIDE THE FULL RANGE OF PRIVATE SOLUTIONS FRO MORE THAN **500** CUSTOMERS.
